

## AlarmSense Detector Base

Part No. 45681-244APO

### Overview

- Compatible with all AlarmSense fire detectors.
- Includes on-board 'removAlert' circuitry that detects the removal of an AlarmSense detector and reports a fault back to the control panel.
- Continues to work during the unauthorised removal of detectors.
- Quick and simple installation.
- Less than 3 $\mu$ A quiescent current with detector fitted.
- The 45681-244APO is NOT required on AlarmSense detectors that are used as part of a detector/sounder base or detector/sounder visual indicator base combination.

### More Information

### Technical Specifications

Quiescent current	Less than 3 $\mu$ A with detector head fitted.
Product dimensions (mm)	100mm diameter.
Construction & finish	White polycarbonate.
IP Rating	TBC.
Weight	55g.
Notes	Load presented to Zone when detector removed is 47 $\Omega$ for 10ms every 4 seconds.
